Education

University of Florida

Bachelor of Science in Computer Science

GPA: 3.83

Minor: Business Administration

Certifications:

- Artificial Intelligence Fundamentals and Applications

Gainesville, FL

Expected May 2026

Skills

Languages: C++, Python, Java, JavaScript, TypeScript, SQL

Web Development: HTML5, CSS3, Node.js, React

Databases: MySQL, PostgreSQL (Supabase), MariaDB

Tools & Workflows: Docker, Git, Agile/Scrum, Unit Testing, Debugging

Projects

Swamp Path: Student Scheduling Platform | Oct 2025 – Dec 2025

- Engineered a centralized course registration platform using React.js that integrated real-time conflict detection and professor ratings, following HCI principles to minimize extraneous cognitive load.
- Conducted a formal between-subjects user study that demonstrated a 72% reduction in task completion time and an 11x increase in information retrieval speed compared to the University of Florida's official system.

Reinforcement Learning Driving Agent | Aug 2025 – Oct 2025

- Designed and implemented a Deep Q-Learning agent using Python, PyTorch, and Pygame, building a custom reward system and environment to teach autonomous driving behavior through iterative self-improvement.
- Developed a complete training pipeline with checkpointing (model, optimizer, exploration state) and continuous learning, enabling the agent to master an optimal racing line and achieve consistent high-speed lap completions.

Full-Stack Stock Trader | Jul 2025 – Aug 2025

- Developed a full-stack dynamic stock trading platform where authenticated users manage a portfolio, making monthly buy/sell decisions based on generated, fluctuating market data.
- Engineered using React/TypeScript, a Python/Flask backend, and a Supabase (PostgreSQL) database, implementing secure, atomic transactions with custom SQL functions to ensure data integrity.

Work Experience

FunCamps - Camp Counselor | Jul 2023 – Aug 2023

- Facilitated daily project-based learning activities in the fields of STEM, arts, and outdoor education for groups of 10 to 12 campers.
- Mentored a team of campers, applying leadership, communication, and problem-solving skills to achieve 100% project completion.

Publix - Front Service Clerk | Jul 2019 – Jul 2022

- Collaborated within a team of 15+ associates to execute daily store operations, accurately processing hundreds of customer transactions using a cash drawer and contributing to improved efficiency.
- Trained 3 new hires on point-of-sale systems, store policies, and customer service best practices, accelerating their onboarding.
